This article has been retracted by Darcy & Roy Press following an allegation that this article is an almost direct copy of another published work.

Darcy & Roy Press has investigated in line with the COPE guidelines, and agree the evidence shows this work was first published elsewhere by different authors [1]. The authors have not been able to provide a satisfactory explanation for such substantial overlap. As a result, in line with the COPE retraction guidelines, Darcy & Roy Press retracts this article for plagiarism.

Despite responding in earlier stages of the investigation, the authors have not commented on the wording of the retraction notice.

Retraction published: September 02, 2025.
